

The Guide for Authors

Before submitting a paper, the author is advised to follow closely the following instructions to prepare the paper.

1. If an author wants to submit a paper to this Journal, the paper must be an unpublished and original work that is neither under review elsewhere nor will be submitted elsewhere for publication without withdrawing from this Journal.
2. This Journal requires that all results (experimental, empirical and computational) be replicable. All underlying data necessary to replicate results must be made available to the Journal.
3. Papers must be submitted as pdf files and the size of the text font must be at least 12 point. Each figure and table must be included on the relevant page of the paper and should not be collected at the end of the paper. The list of references should appear after any appendices, at the very last part of the paper.
4. There is no restriction on the number of pages of any submitted manuscript. However, very long manuscripts may take considerably more time to review.
5. Each submitted paper should have an abstract of no more than 150 words containing no mathematical formulas. We also encourage authors to make the introduction of their submitted articles understandable to the widest audience possible.
6. The first page of each submitted paper should contain every author's e-mail address, phone number and affiliation.
